

PAS24 SECURITY DOOR

PAS24 is a standard of testing used to measure and assess the security of doors and windows against attack from an opportunistic intruder. PAS24 offers the benchmark for enhanced security performance.

Our PAS24 flat entrance doorsets offer enhanced security performance against vandalism and intruders. They also offer fire and smoke performance to BS 476 Part 22 and are available with sound reducing properties of up to 35dB.

All door sets are pre hung on hinges in pre-assembled frames. Machined and supplied with the necessary high-performance ironmongery.

It features a heavy duty rated door core and comes in a wide range of finishes.
